Hibagon® Mobile Data Safe

Transfer large amounts of data physically and securely from one location to the other. Hibagon Mobile Data Safe is a robust, shock-proof and water resistant storage device that transports your data across companies, cities, countries and continents irrespective of weather conditions and transportation vehicles.

Ideal for

- ✓ Media and entertainment
- ✓ Military
- ✓ Healthcare
- ✓ Public sector
- ✓ Cloud Service Providers
- ✓ Finance
- ✓ All businesses with a need for secure content distribution

You buy it - you own it

„Hibagon is not a service. It's a physical and armoured storage system that allows you to stay in full control of the data that is stored on it. Use it to overcome typical challenges associated with large data transfers like bandwidth bottlenecks, poor internet connections or costly data transfer fees.

Data migration

Use Hibagon if you want to migrate large amounts of data from or to the cloud:

-  Initial transfer from on-premise data to a private or public cloud
-  Move data from offline tapes securely to the cloud when you're limited by time
-  Offline transfer of uber sensitive data for compliance and security reasons
-  Move older backup files to the cloud to save cost

Limitless and secure data transfer

Choose Hibagon if you need to move large amounts of data from one location to another without the risk that your valuable data gets lost or compromised. All data is encrypted and will stay secure throughout the entire duration of the journey. Easily transfer your data offline when you're facing connectivity limitations, bandwidth constraints or have no internet connection at all.

Disaster Recovery

When a disaster strikes quick access to mission critical data is vital. Whether the lights are out due to a ransomware attack or severe weather conditions, Hibagon allows you to restore essential data to an on-premise network within a short period of time.

RNT Rausch. Making IT possible.

RNT Rausch is a Germany based technology pioneer with 20+ years of experience in the high-tech server and storage industry and on a mission to always be ahead of technology trends. RNT offers tailor-made products and services that help customers and partners to enhance security, flexibility, scalability and sustainability and become fit for tomorrow's technical revolution.
